... late summer-early fall is the time. Take advantage of the winning combination — Nature's best planting season and Scotts Lawn Care Products.

### Here's the easy program:

- (1) Apply 4-XD to dispose of broad-leaved weeds.
- (2) If Crabgrass is present, wait 2 or 3 days, apply SCUTL to stop it. Repeat per directions in package.
- (3) If weather is dry and lawn can not be watered, delay further treatment until after soaking rain.
- (4) Apply Turf Builder to feed grass, 10 lbs per 1000 sq ft.
- (5) Late August or early September — sow Scotts Seed, 2 to 4 lbs per 1000 sq ft. Keep moist if possible.

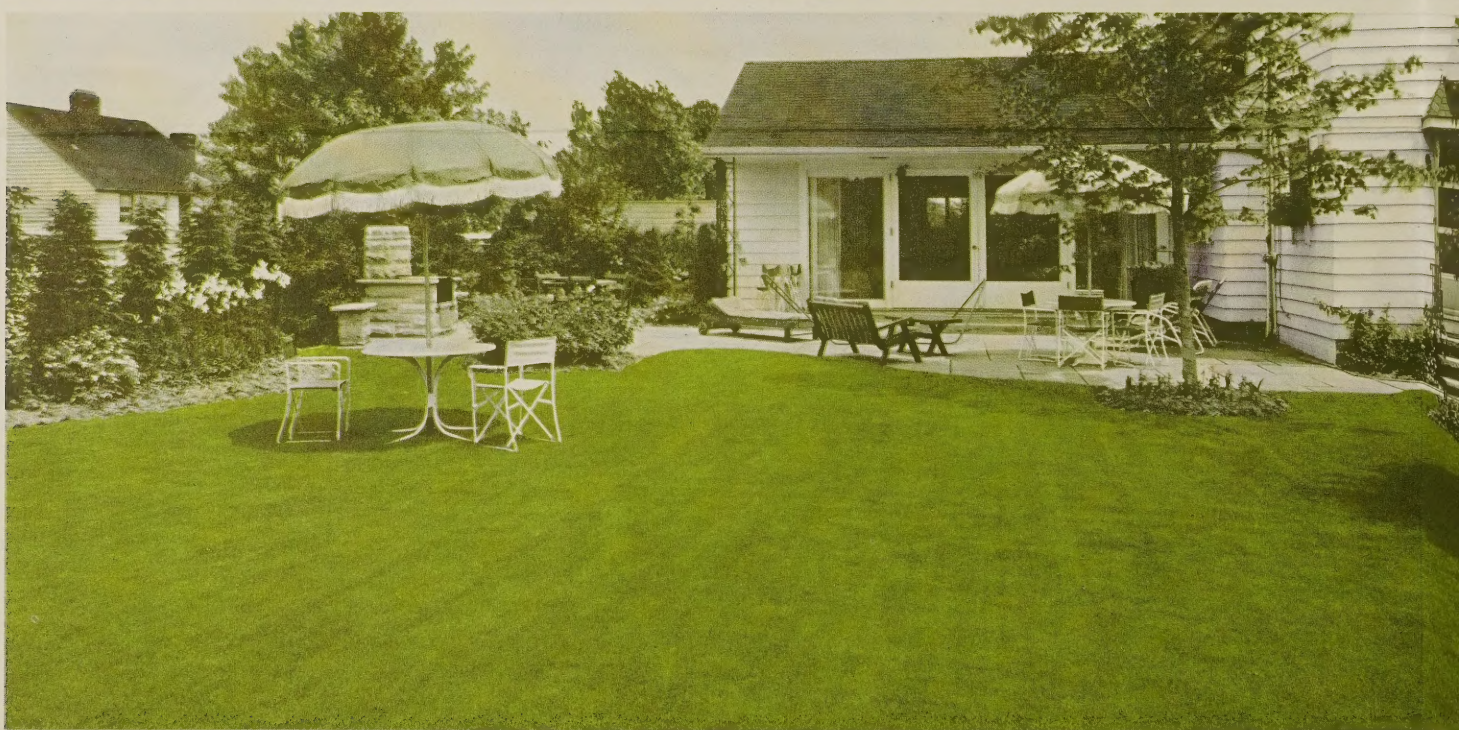

In starting NEW LAWN in the Fall, be sure to build up soil with Turf Builder. See Lawn Care Book for instructions in grading and soil preparation.

# The Neighbors

# Neighborhood watched while SCUTL went to work . . .

The grass that carpets the outdoor living quarters for the Samuel Smiths of suburban Cleveland is well known for its thick exquisite texture, cool green color. Just this spring it received *new laurels and acclaim with color pictures in a leading garden magazine*. Here is a lawn that seemed to have everything . . . good seed . . . good soil . . . regular feeding, watering and mowing.

But despite loving care, Crabgrass was a constant threat. Nothing seemed to stop its yearly invasion, not even tedious and expensive hand weeding. Then the Smiths learned about SCUTL . . . decided to give it a try. *This was a crucial test*. Under the scrutiny of the entire neighborhood SCUTL licked Crabgrass with not a whit of damage to the prized turf.
